Using Implementation Science in Practice

Monday 16th and Tuesday 17th April 2018
Room 02 EFH01, Engineering for Health Building University of Surrey

This two day seminar is for healthcare professionals, managers, commissioners, researchers and policy makers in both the public and private sector who want to make effective use of evidence based treatment and care.

The seminar will be structured around four main themes:

1) Introduction to implementation science
2) Pre-implementation planning
3) Implementing your project
4) Post implementation; adoption, spread and sustainability

The seminar includes lectures, practice examples and facilitated small group work to support participants to use implementation science more effectively in practice.

The seminar is led by international experts in the field of implementation science including Dr Brian Mittman, Senior Research Scientist at the Kaiser Permanente Southern California Department of Research, US, Professor Sharon Straus, Chair in Knowledge Translation and Quality of Care, Department of Medicine, University of Toronto, Carl May, Professor of Healthcare Innovation, University of Southampton and Dr Siw Calfjord, Linköping University, Sweden.

How to enrol
For more information on how to book your place go to: http://store.surrey.ac.uk/conferences-and-events/fhms-faculty-of-health-medical-sciences/conference-events/using-implementation-science-in-practice-monday-16th-april-2018

Cost: £400 Academic / NHS Commercial

For more information please contact:
Ali Bilovodska
T: 01483 684078
E: a.bilovodska@surrey.ac.uk
Office hours: Mon-Fri: 8.45a.m. – 5.00p.m

NB: Participants will be asked to describe an implementation project which they would like to develop when they register.
